Records required by DM 7.6

Airworthiness directives / service bulletins addressed; defects rectified	
Instructions / technical data used	
Critical components fitted (part no. / serial no. / DOM)	

Section 3 – Condition Statement and Certification

In the opinion of the parachute technician, the equipment is in the following condition: ☐ Excellent ☐ Good ☐ Satisfactory ☐ Poor ☐ Unserviceable / unairworthy – do not sign below; mark the equipment unserviceable and return it to its owner (SPM 3.1)

Whilst the equipment has been inspected with all reasonable care, the technician's signature does not give or imply a guarantee that the equipment is free from defects other than those identified above. The next inspection and reserve repack is due within seven (7) months of the date below (SPM 2.6.1), or sooner if required by the manufacturer or the local authority where the equipment is used.

By signing below, the parachute technician certifies that, in respect of the work carried out (DM 7.6):

- The equipment is airworthy and serviceable; and
- They were suitably qualified and current at the time the work was carried out; and
- The work was carried out in accordance with NZPIA standards and procedures.

Parachute technician (name)		NZPIA PT certificate no.	
Signature		Date	
Supervising PT (if work done under supervision)		PT no. / signature	

This form is part of the maintenance record for the equipment. If a separate record is used, note this on the packing data card (DM 7.6). The owner should keep a copy until the work is superseded; PTs must keep their own records for at least five years (DM 7.6).
